Flowtrac Integration Fact Sheet

Seamless Inventory Management Delivered with Unanet and Flowtrac

Flowtrac

Automate procurement, costs of goods and inventory tracking by keeping inventory lists, available quantities and costs in sync with Unanet Purchasing and Invoicing.

Flowtrac's software tracks Inventory, Assets, and Work In Process quantities, lots, and/or serialized items using barcode/RFID devices for fast and accurate information. A flexible platform allows modifications to meet specialized requirements.

Unanet and Flowtrac can integrate:

FLOWTRAC TO UNANET

- Inventory Information
- Information for Automated G/L Posting

UNANET TO FLOWTRAC

- Purchase Order Information
- Vendor Information
- Project and Task Information
